Pre-Summit Session, April 6

Clean Transportation Efficiencies Forum

This daylong forum will educate fleets about the strategies, technology options, and best practices associated with increased vehicle sustainability and efficiency. This includes petroleum reduction, alternative fuels, electrification options, and incentives for clean vehicles and infrastructure. Organized and presented by CALSTART, CarbonBLU, Clean Cities Sacramento and Clean Cities East Bay, this special event will include a fleet vehicle showcase and ride-and-drive!

Concurrent Sessions, April 7

Easy Ways for Businesses to Lower Their Fleet Carbon Footprint... and You Can Do the Same At Home!

Learn about easy ways to begin making improvements with practical ideas and guidance to more efficient use of capital, reducing your energy use, reducing waste and steering your company toward a more efficient and sustainable future.

Hydrogen, the Fuel of the Future and It's Here Today! Early commercialization of fuel cell automobiles has begun. Learn about the grants, incentives and funding opportunities for fuel cell vehicles and hydrogen stations and how the commercialization of fuel cell vehicles and hydrogen fueling stations will roll out.

Battery Electric Vehicle and Electric Chargers (EVSE) - Funding and Technology Update Demand for electric vehicles (EV) has risen significantly as more vehicles have become available. What considerations should the consumer/business make when installing an electric charger? What incentives, grants and credits are available for EVs and EVSE? This session will answer these questions and more.

Sessions organized by Clean Cities Sacramento and East Bay. [Click here](#) for program details.
